

26 November 2025

Dear Customer,

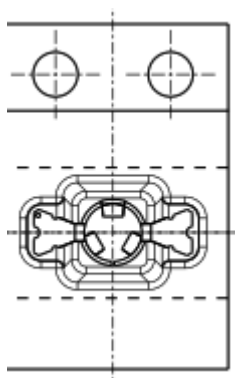

Re: Product change notification for Harwin product.

There has been a change to the tape pocket design on the following products:

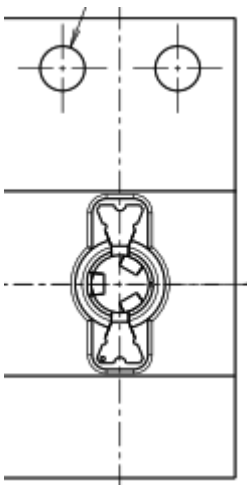

Part Number	Tape Width change	Technical Drawing
S9321-45R	From 12mm to 16mm	https://content.harwin.com/m/6e5fac48b10dcdfd/original/DRG-03099-Technical-Drawing-Datasheet-S9321R-pdf.pdf
S9341-45R	From 12mm to 16mm	https://content.harwin.com/m/a64f993176b0a704/original/DRG-03100-Technical-Drawing-Datasheet-S9341R-pdf.pdf

Please see the latest Technical Drawing following the links above.

The contacts have changed orientation in the tape:

Old pocket orientation

New pocket orientation

This revised packaging method has been tested and continues to meet the EIA-481 requirements. The Sycamore Contact sockets are not affected and remain unchanged.

This packaging improvement minimises the risk of these miniature low-profile contacts turning or twisting within the pocket - increasing assembly efficiency.

All new and existing orders at Harwin for S9321-45R and S9341-45R product will be supplied in the new tape and reel packaging. Reels with the new orientation pockets will be clearly labelled for a minimum of 12 months. Using the new orientation will require a change to your Pick/Place machine setup.

As stock filters through our Distribution network, you may still receive the old design in the short term.

If you have any further questions regarding this letter, please do not hesitate to contact us.

Yours faithfully,

The Product Change Team
